OCCUPATIONAL MARKET COMMENTARY

Haydock is acknowledged as one of the regions premier distribution locations with the North West with direct access to the regional and national motorway network via J23 of the M6. Haydock was originally developed in the 1970's but has subsequently seen considerable development for mid and big box schemes with occupiers including Sainsburys and Amazon.

The North West industrial market is well positioned when compared with other regions and sectors due to continues investment in infrastructure. Key examples of this include the opening of Peel Ports £400 million deep water container terminal Liverpool2 in 2016, the £600 million New Mersey Gateway Bridge in 2017, the completion of the £190 million A556 trunk road between the M56 and M6 motorways in 2017 and continued expansion/development of Manchester Airport as a major global hub.

The distribution market in the North West is experiencing consistent and significant levels of demand for good quality 'big box' accommodation with an average take up of 4.3 million sq ft per annum making it the most active region outside the South East over the last 24 months. Units above 300,000 sq ft have seen consistent strong demand with over 2.1million sq ft of transactions in the last 12 months representing over 50% of overall 'big box' take-up.

The current shortage of deliverable sites across the North West has resulted in limited large scale building supply across region with on 2 units above 350,000 sq ft currently available.

The similar lack of Grade A/B supply, together with consistent occupiers demand in the North West, has result in reduced void periods and strong headline rentals being achieved. As such rental growth in the North West has out-performed most parts of the UK and remains a key performance driver with North West industrial rental growth forecast to be over 2% per annum (source: B8RE).

Prime distribution rents are now established in excess of £6.50 per sq ft.

Key recent lettings in the North West are as follows:

DATE	SCHEME	AREA (SQ FT)	RENT PA (£PSF)	TENANT	GRADE
Q4 2018	Mountpark Omega Warrington (J8, M62)	346,153	£6.50	Royal Mail	A
Q4 2018	K333 Trafford Park (J9, M60)	333,562	£6.40	AKW	A
Q4 2018	MW353 Middlewich (J18, M6)	353,102	£5.25	Go Outdoors	B
Q3 2018	M6 Major Haydock (J23, M6)	361,062	£9.38	Amazon	A

INVESTMENT MARKET

Sales volumes in the North West are currently well ahead of the 10-year average as investor demand for the region continues to surge.

There remains a significant weight of capital chasing the industrial sector with investors buoyed by strong occupational fundamentals including record levels of take-up, historically low availability rate and a constrained development pipeline.

On average, 260 acres per annum of industrial land has been lost to residential development as Local Authorities seek to address the housing crisis. The combination of diminishing stock levels and robust occupational demand, driven by ecommerce requirements has created a positive demand/supply imbalance, and a strong rental growth dynamic.

Current investor demand is being driven by sectors offering strong occupational growth and potential to enhance income returns.

The continued structural shift provided by the 'evolution' of online retailing, the consolidation of retailers, and the automotive push on occupational demand, all set against a backdrop of historically low availability and lack of alternative investment opportunities, has resulted in the industrial and logistics market attracting strong attention from a wide range of investors.

By way of comparable evidence, we believe the below examples are the most relevant to support our pricing and are indicative of the typical buyers for this type of product and lot size.
